When It Comes to Intraoral X-Rays

**x-ray2go**

Is the Way2go!

- The logical solution for new practices! A great alternative to bulky wall-mounted x-ray generators!
- Perfect for mobile dentistry, home care, nursing home patients, missionary and military use!
- Replaces your older x-ray heads without low settings! Go digital—fast, easy & economically!

- Handheld Portable x-ray device
- FDA Registered - K082875
- Safe to use-leakage and scatter radiation are less than conventional wall-mounted units
- Small & lightweight (4 lbs, 4.4 total)
- Camera-like ergonomic design
- 100’s of images on single battery pack charge!
- 2nd battery pack available.
- Compatible with both digital & film use
- Highest image quality
- Wide exposure range
- Lowest patient exposure
- Compact outside - smart inside
- Great staff acceptance
- Convenient for children and “x-ray phobic” patients
- Helps eliminate patient fear and reduces x-ray rejection
### Specifications

| X-ray installation                        | Tube voltage: 60KV  
|                                         | Tube current: 2mA  
|                                         | Heat Capacity: 8.5KHU  |
| X-ray Generator                          | Type: High Frequency Inverter  
|                                         | Power Output: 100W  
|                                         | X-ray Tube  |
| X-ray Tube                               | Anode Type: Stationary  
|                                         | Anode Angle: 20°  
|                                         | Focal Spot: 0.8mm  |
| X-ray Control                            | Exposure time set 0.01 ~ 1.6sec (0.01 sec step)  |
| Power Requirement                        | 25.2VDC from external battery  |
| Weight                                   | 4.4 lbs. (4.0 handheld unit, 4.4 lbs. total with battery pack)  |
| Dimensions                               | 6.7”(W) x 6.1”(D) x 5.25”(H)  |
